GLUE

Recommend using regular printer paper!

1. Carefully cut out mask
2. Cut out eye holes on dotted line
3. Make a small hole in the suggested area on each sides to attach string
4. Apply adhesive to the lighter areas marked "glue"

5. Bring the spilt sides together, putting the lighter "glue" colour underneath, this will create a 3D effect!
6. Fold ears forward.
7. Fold hair tuft forward and attach lighter side to under the mask on top of head. Wear. Enjoy!
