The British Ecological Society is the largest ecological society in Europe, in terms of our membership and the wide range of services and activities we provide. Our members are central to our work in science and outreach; through them we represent not only ecologists but the science of ecology as well.

Our vision is: a world inspired, informed and influenced by ecology

We achieve this through:

- Developing ecological science and scientists
- Improving quality of education and capacity building
- Promoting the use of ecological science
- Building collaborative partnerships

Join online now at britishecologicalsociety.org. Half price student/retired/reduced rate. First year free for all undergraduate, masters and 1st year PhD students.

The benefits of joining the Society include:

- Free access to all seven BES journals
- Open access publishing discounts for our journals and our partner journal *Ecology and Evolution*
- Member-only discounts from leading scientific publishers
- Apply for research, and training and travel grants which are only open to BES members
- Reduced price registration for BES run and sponsored meetings. Student members are entitled to further discounts
- Access to mentoring schemes and training for BES members
- Free copy of *The Niche*, our quarterly full colour magazine
- Networking opportunities to meet and interact with other ecological professionals

We publish seven high-profile ecological journals:

- *Ecological Solutions and Evidence*: an open access journal publishing articles with direct relevance for the management of biological resources and ecological systems.
- *Functional Ecology*: an open access journal publishing papers that significantly advance our mechanistic understanding of ecological pattern and process from the organismic to the ecosystem scale.
- *Journal of Animal Ecology*: the best animal ecology research that develops, tests and advances broad ecological principles.
- *Journal of Applied Ecology*: novel, high-impact papers on the interface between ecological science and the management of biological resources.
- *Journal of Ecology*: high-impact papers on all aspects of the ecology of plants (including algae), in both aquatic and terrestrial ecosystems.
- *Methods in Ecology and Evolution*: an open access journal promoting the development of new methods in ecology & evolution, and facilitating their dissemination and uptake by the research community.
- *People and Nature*: a broad-scope open access journal publishing work from across research areas exploring relationships between humans and nature.

The British Ecological Society is a charitable company, registered in England No. 1522897 and limited by guarantee.
