HOW TO STUDY EFFECTIVELY

Get organized

Make a planner for homework, projects, tests, and assignments. You can also create a study plan, so you can think about what needs to be accomplished.

Pay attention in class

Practice active listening by concentrating and avoiding distractions when the teacher is speaking.

Ask questions

If you don't understand something, ask questions. If you don't feel comfortable in front of everyone, you can talk to the teacher after class.

Study with a group

This will give you a chance to test your knowledge and help boost each other's confidence.
